DETAILED ACTION

Drawings

New corrected drawings are required in this application because the drawings submitted 8/21/03 do not appear to be formal drawings of the originally filed drawings. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Woods on 4/22/04.

The application has been amended as follows:

In claim 1 line 25, replace “,” with ---.

Allowable Subject Matter

Claims 1-87 are allowed.

The following is an examiner's statement of reasons for allowance:

A gastrointestinal lead and method comprising an electrode head wherein at least one stimulation/sense electrode and an active fixation mechanism is supported at each lead body leg distal end whereby a plurality of active fixation attachment mechanisms are supported by a plurality of electrode heads as claimed is not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Familoni '249 and 503 and bourgeois et al '992 disclose related gastrointestinal tract sensing and stimulating devices and methods.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Manuel whose telephone number is (703) 308-2118.
